

SATHISHKUMAR S

DevOps Support Engineer

Chennai, India | +91-8838302558 | sathishkumar07ofc@gmail.com

PROFESSIONAL SUMMARY

DevOps Support Engineer with 2 years of hands-on experience in CI/CD automation, Kubernetes administration, Docker containerization, Azure cloud infrastructure, monitoring, and production support. Experienced in Jenkins pipelines, Azure AKS, Prometheus/Grafana, Python/Bash automation, incident troubleshooting, deployment support, and SRE practices.

CORE SKILLS

CI/CD & Automation	Jenkins, CI/CD Pipelines, Deployment Automation, Rollout Strategies
Containers & Orchestration	Docker, Kubernetes, AKS, Auto Scaling, Pod Scaling, Ingress, Services
Cloud	Microsoft Azure, AKS, Virtual Machines, Azure Container Registry, Blob Storage, Databases
Monitoring & SRE	Prometheus, Grafana, Dashboards, Alerting, Production Monitoring, Incident Troubleshooting
Scripting & Development	Python, Bash, React, Automation Scripts
Tools & Platforms	Git, GitHub, Linux, Apache Airflow, Crontab
Databases	MySQL, Azure Databases

PROFESSIONAL EXPERIENCE

DevOps Engineer — Prodapt Solutions Pvt. Ltd., Chennai

Nov 2024 – Present | 2 Years

- Designed and maintained **Jenkins CI/CD pipelines** for automated build, test, release, and deployment across production, staging, and testing environments.
- Managed **2 Kubernetes clusters** across on-premises and Azure AKS, including pod deployment, scaling, Ingress, services, and workload management.
- Implemented **Horizontal Pod Autoscaling (HPA)** and resource-based scaling to dynamically adjust workloads based on application demand and improve resource utilization.
- Supported Kubernetes deployments using **rolling updates, self-healing, readiness/liveness probes, service management, Ingress, and auto-scaling** to improve application availability and deployment reliability.
- Containerized applications using **Docker** and integrated container build and deployment workflows with Jenkins CI/CD pipelines.
- Built and maintained **Apache Airflow DAGs** for workflow orchestration and managed Linux crontab for scheduled operational tasks.
- Implemented **Prometheus and Grafana** monitoring, dashboards, and alerting for system health visibility, capacity tracking, and incident detection.
- Managed Azure infrastructure including **AKS, Virtual Machines, databases, Azure Container Registry, and Blob Storage**.
- Developed **Python and Bash automation scripts** to reduce repetitive manual operations and improve engineering productivity.
- Built internal DevOps tools using **Python and React** for deployment tracking and monitoring; used AI-assisted troubleshooting to accelerate incident analysis and reduce MTTR.

KEY ACHIEVEMENTS

- Reliable Kubernetes Operations:** Supported production workloads using auto-scaling, rolling updates, health probes, self-healing, Ingress, and service management.
- Kubernetes Cluster Upgrade:** Upgraded 2 Kubernetes clusters with zero data loss and no disruption to running workloads and services.
- AI-Integrated Log Viewer:** Architected a full-stack application to centralize and visualize Kubernetes logs across environments.

EDUCATION

Bachelor of Computer Applications (BCA) — Annamalai University – SSBSTAS College

2021 – 2024 | CGPA: 8.6

CERTIFICATIONS & TRAINING

- Java Full Stack Development Certification** — Uniq Technology
- 2-Day Bootcamp** — Agentic AI
